128 Pregnant Women, 25 Tots Under Age 2 Given Wrong RSV Vaccines, CDC Says

The shots were accidentally administered after CDC staff failed to timely implement simplified ordering, as recommended by the FDA and Food Drug Administration for adults ages 50 and older — but not for children or babies.

Nearly 150 pregnant women and 25 children under age 2 were given the wrong respiratory syncytial virus (RSV) vaccine, according to the Centers for Disease Control and Prevention (CDC).

The CDC said in a Health Advisory and Update issued Thursday that 128 pregnant women and 25 children received Arexvy RSV vaccine GlaxoSmithKline) Arexvy RSV vaccine GlaxoSmithKline) Arexvy RSV vaccine GlaxoSmithKline)
